Thanks for setting this up. I think part of our folks will be able to stay for the full hour, but a couple will likely need to jump off early.

Best,
Amanda

Hello Amanda

The meeting is for 1 hour. This will get us started. A few people from various divisions have been invited to attend the meeting to hear the background/concerns. Going forward, we may not need all that have been invited, but I thought I would be inclusive of all that may have some input for this initial conference call.

Conference # and code

Dial: Ex. 6 Personal Privacy (PP)
Code:

Regards, Cynthia

Hello Cynthia,

Our folks can do a call from 2:30 – 3:00 on June 20th – while short, I think that should be a good start and follow up can be done after if needed.

Best,
Amanda

Hello Amanda

I have been in contact with some of my colleagues in the various divisions in our program in order to schedule a conference call. I am looking at our schedules for June 20th at 2:30 to schedule this conference. Can you let me know if that date and time works for your schedule. If you need to have the conference call on an earlier date, let me know.

Thanks, Cynthia

Thank you Cynthia,

A call would be great and I am happy to work with you or your staff to set something up. Here is the list of potential agenda topics we'd like to discuss:

- Background about pan-azole resistant *Aspergillus fumigatus* infections in susceptible patients (mortality rate ~90%)
- In Europe, mutations linked to environmental fungicide use
- First US cases recently reported
- Detection of pan-azole resistant strains from US agricultural site
- Potential EPA and CDC collaborations; communications and science

Best,
Amanda

Hello Amanda

My Branch has some of the conazole fungicides. If you want to have some communication on this topic I can gather some folks here to start the conversation. If you want to have a telecom, please provide agenda/topics for discussion. I am not in the office today, but will address your response when I return.

Cynthia

Good afternoon Cynthia,

I work at CDC in the Division of Foodborne, Waterborne and Environmental Diseases. Experts in our Mycotics Diseases Branch are doing some work related to azole-resistant aspergillus and we wanted to reach out to EPA and initiate communication around this topic. I've received your contact information from Arnold, per the email chain below. I am cc'ing our two SMEs, Dr. Shawn Lockhart and Dr. Brendan Jackson, who would be POCs here.

Thanks very much!
Amanda

Good afternoon Arnold,

I am reaching out to you to find a good contact in the fungicide office at EPA. One of our SMEs has a paper coming out on azole resistant aspergillus and we'd like to connect with EPA ahead of publication. I received your name from colleagues working on Zika and thought I would start with you. Any suggestions or connections you'd recommend are welcome.

Best,
Amanda
